Week11 – Marketing and Advertisement

Is advertisement necessary?

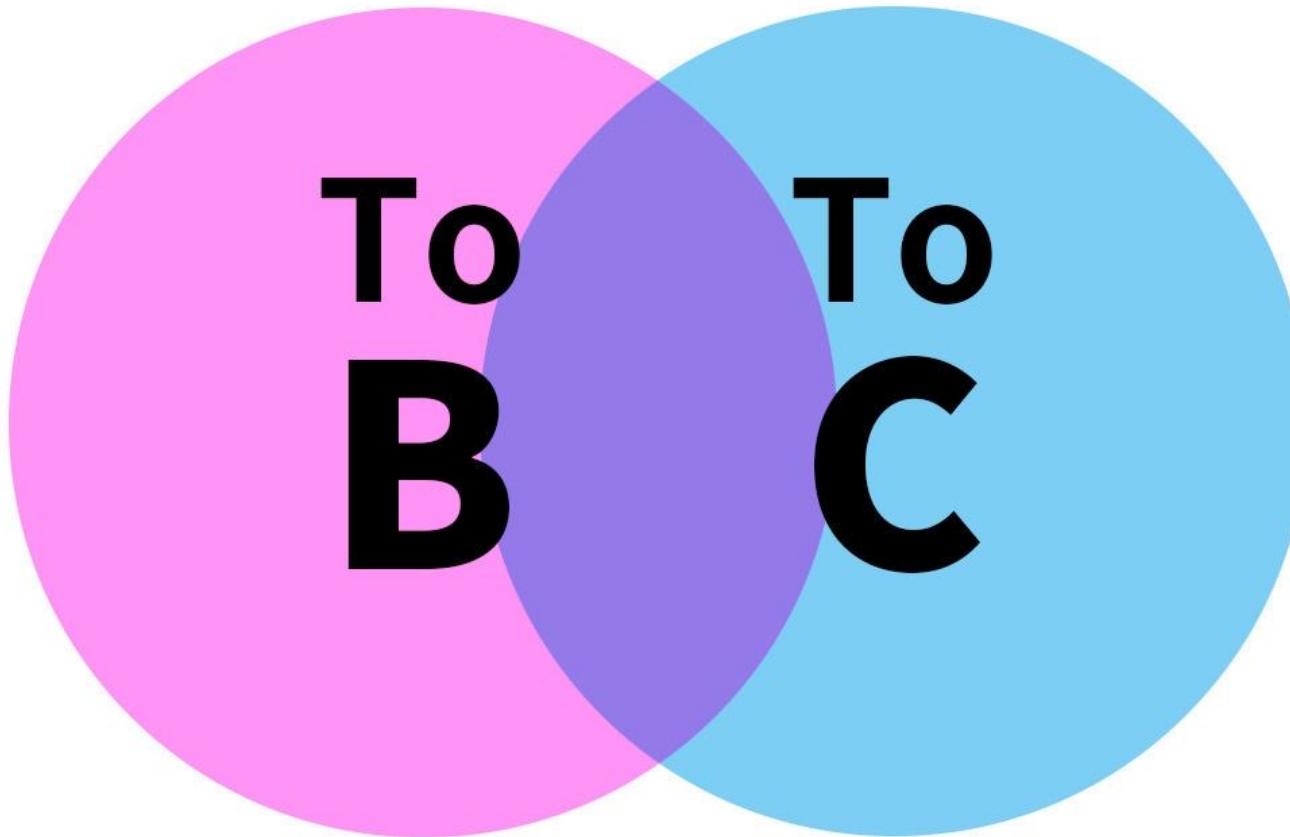

Is advertisement necessary?

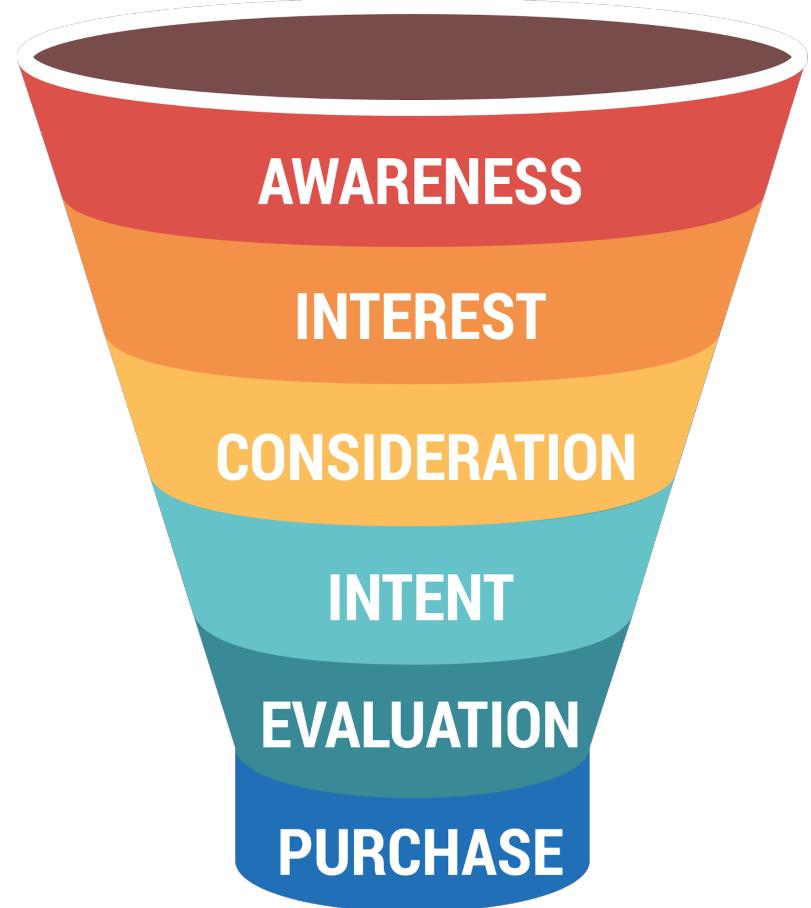

https://m.sohu.com/a/154799640_693172

Marketing

- So many theories about marketing.
- To make it simple, marketing can all be regarded as:
- **How to connect the product/service with the end user**

Marketing

<https://www.investopedia.com/terms/m/marketing.asp>

<https://www.business2community.com/marketing/the-ultimate-guide-to-marketing-funnels-02280375>

Product and Price

Product

Before they can prepare an appropriate campaign, marketers need to understand what product is being sold, how it stands out from its competitors, whether the product can also be paired with a secondary product, and whether there are **substitute products** in the market.

Price

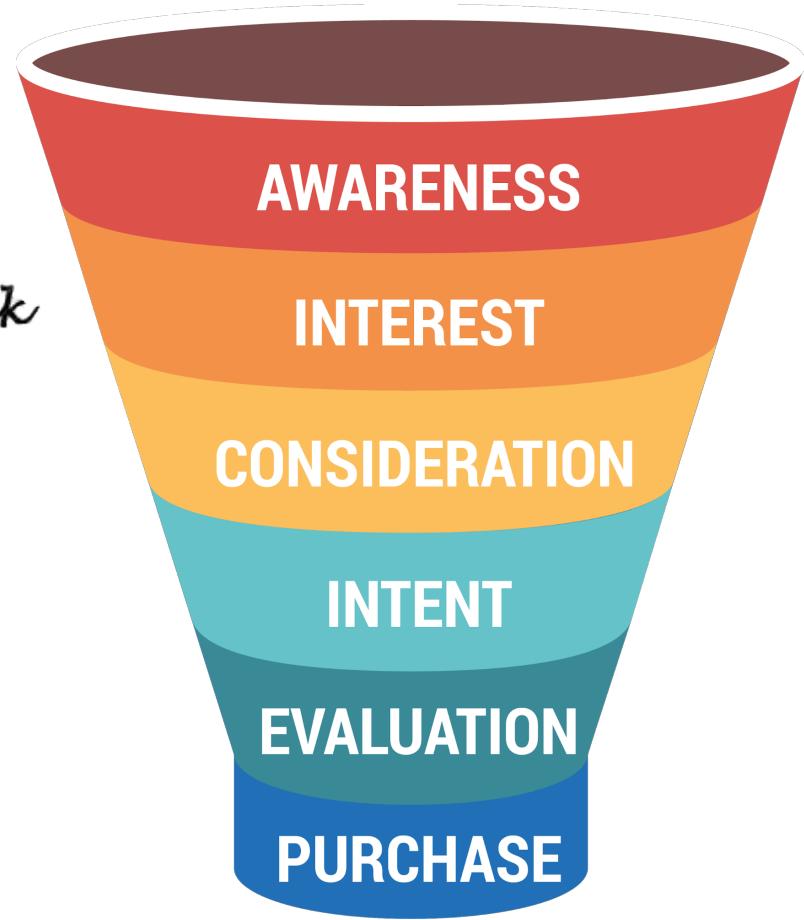

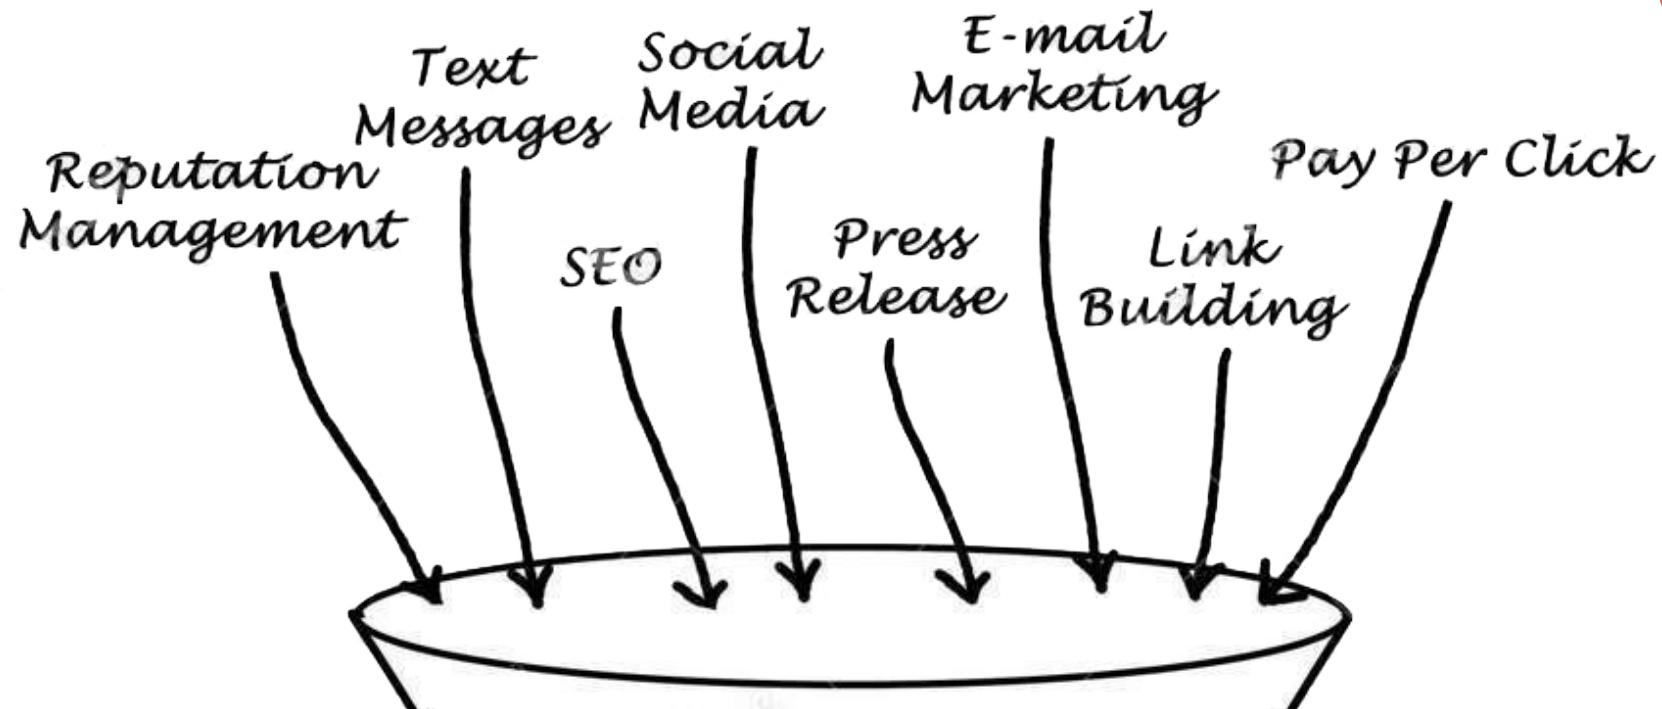

When establishing a price, companies must consider the unit cost price, marketing costs, and distribution expenses. Companies must also consider the price of competing products in the marketplace and whether their proposed price point is sufficient to represent a **reasonable alternative** for consumers.

Place

Place refers to the distribution of the product. Key considerations include whether the company will sell the product through a physical storefront, online, or through both distribution channels. When it's sold in a storefront, what kind of physical product placement does it get? When it's sold online, what kind of digital product placement does it get?

Promotion

Promotion

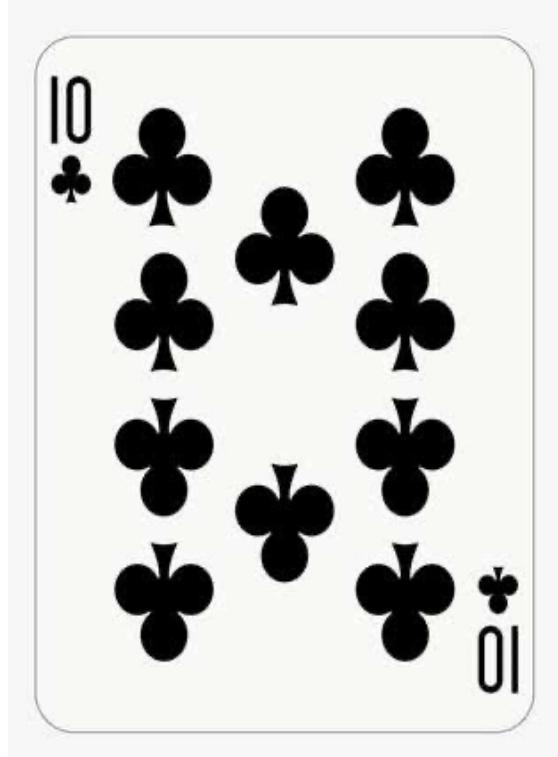

It is the integrated marketing communications campaign. Promotion includes a variety of activities such as **advertising**, selling, sales promotions, public relations, direct marketing, sponsorship, and guerrilla marketing.

Place and promotion

- The choice of online or offline depends more on your target audiences.

Promotion - Multiple

- The effect depends on the *quality* of products

Product and promotion

- The similar story in different era.

Brand: keep your promising

- The term **brand** refers to a business and marketing concept that helps people identify a particular company, product, or individual. Brands are intangible, which means you can't actually touch or see them. As such, they help shape people's **perceptions** of companies or their products.

Brand: keep your promising

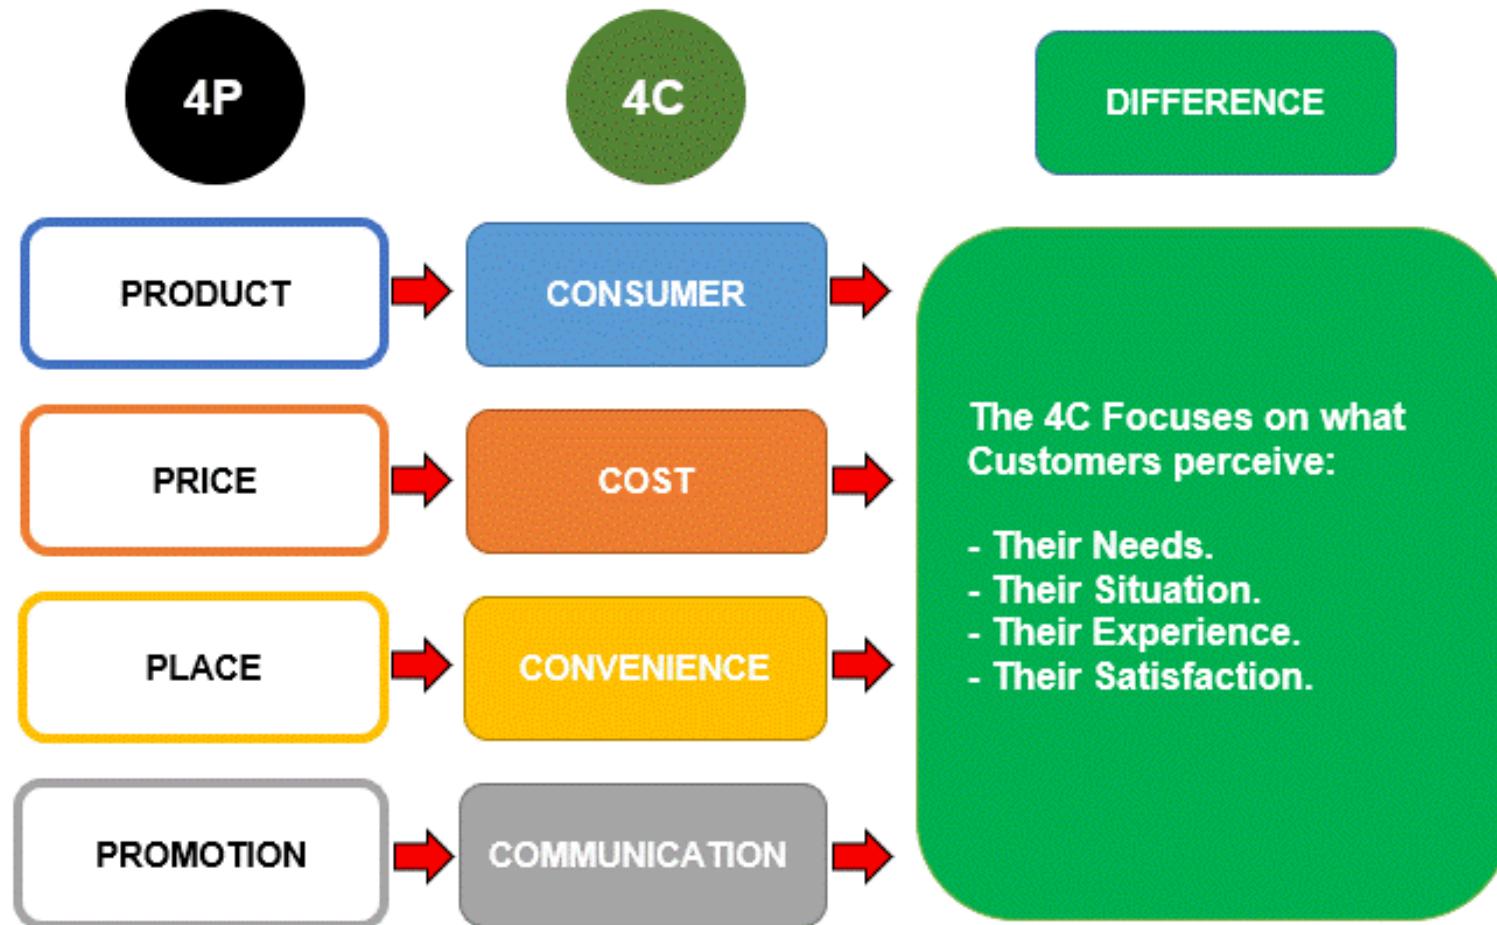

淘宝

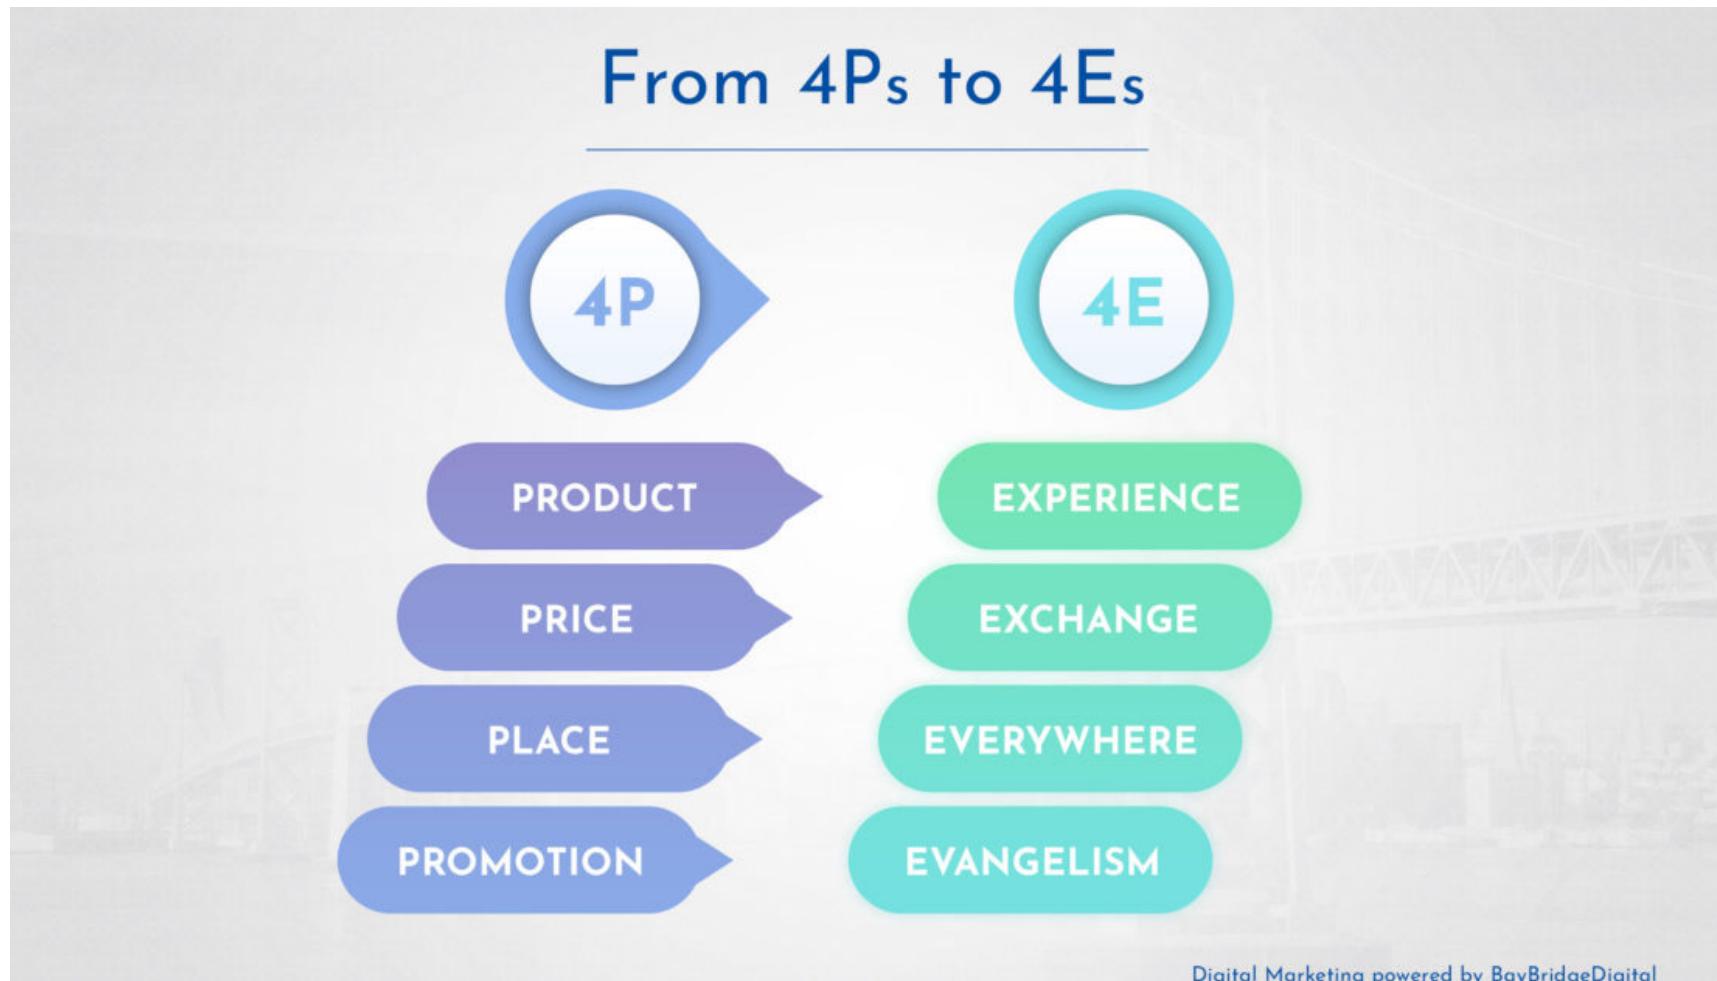

- 多 快 好 省
- Many Fast Good Cheap

2B funnel

General Sales Funnel: 7 Steps

Generalized sales funnel that can be applied to any small business.

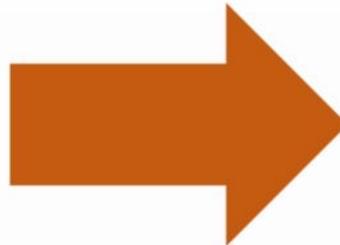

*Based on the research of Neil Rackham

So many terms...

Get traffic

用户接触

Offline / Online

Offline, bustling crowds pass by your place of business. Some of the passerby traffic notices you and walks in.

"Location, Location, Location"

Online, people **search** for information. Millions of people. Each searches alone.

"Information, information, information"

Submit your site

The screenshot shows the Microsoft Bing Webmaster Tools homepage. At the top, there's a browser header with tabs for 'Bing Webmaster Tools' and a search bar containing 'bing.com/webmasters/about'. Below the header, the Microsoft Bing logo and 'Webmaster Tools' are visible. On the right, there are links for 'Help', 'EN', and a 'Sign In' button. A prominent purple banner at the top of the main content area reads: 'Sign up now to get upto 100 USD of FREE credits for Microsoft Advertising. Terms and Conditions Apply.' To the right of the banner is a right-pointing arrow. Below the banner, the main headline says 'Want more users for your site?'. Underneath it, a text block states: 'Get your site's performance data, take advantage of free SEO tools and analyse insights to improve your page rankings on Bing search results.' At the bottom left is a teal 'Get started' button. To the right of the text, there's a graphic featuring three people (two women and one man) interacting with data visualizations like bar charts and a scatter plot.

- 15,600,000 results, how to rank them?

Search engine optimization

What is SEO?

SEO is the act of modifying a website to increase its ranking in *organic (vs paid)*, crawler-based listings of search engines

How do organic search listings work?

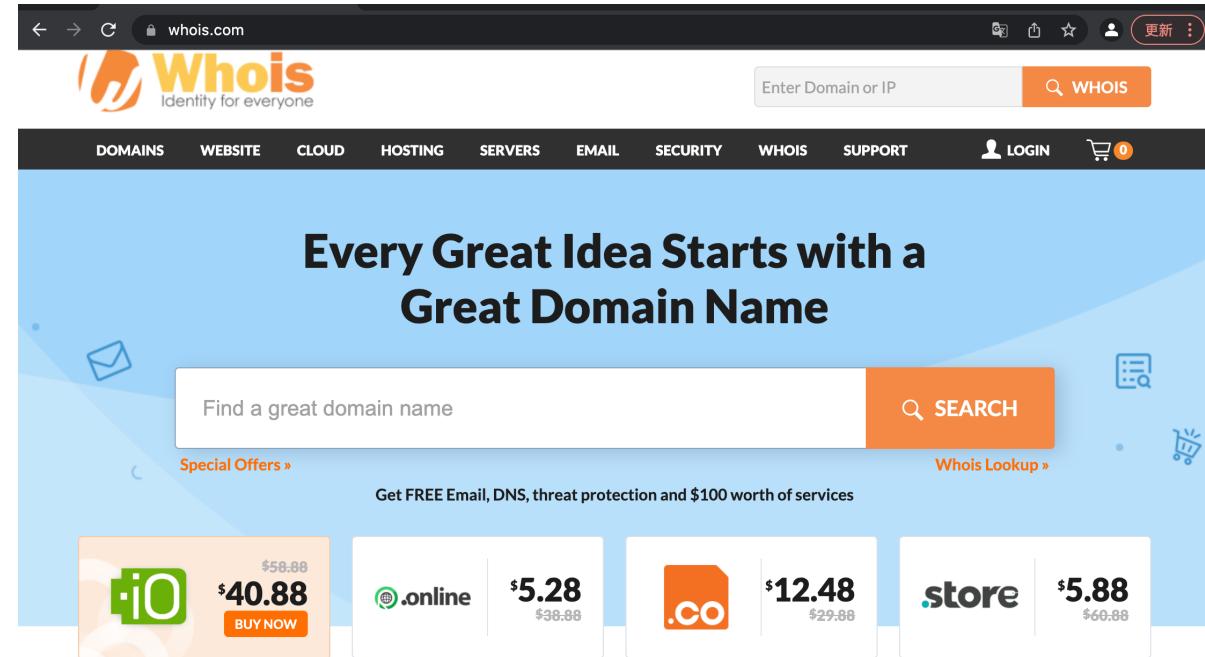

- A *spider* or *crawler* which is a component of a SE gathers listings by automatically "crawling" the web
- The spider follows links to web pages, makes copies of the pages and stores them in the SE's index
- Based on this data, the SE then *indexes* the pages and *ranks* the websites
- Major SEs that index pages using spiders: Google, Bing, Baidu

https://blog.csdn.net/sinat_38992528/article/details/116231920

SEO strategies/techniques

1. Domain name strategies

- domain names are traffic magnets
- choose a domain name that will increase your search engine ranking. How?
- use keywords, location, advertising terms, product names
- choose a keyword that is important for your business

SEO strategies/techniques

2. Linking strategies

- the text in the links should include keywords
- the more inbound links the higher the **SE** ranking
- if the site linking to you is already indexed, spiders will also receive your site
- quality of inbound links is critical
- how to increase links: a) creative content / copywriting b) good outbound links c) target a list of sites from which you can request inbound links
- links for the sake of links can damage your search rankings

“Link relevancy is critical in getting your site indexed by search engines”

“A small number of inbound links from high-quality, relevant sites is more valuable than many links from low-traffic, irrelevant sites.”

SEO strategies/techniques

3. Keywords

- **the most important** in optimizing rankings
- research what keywords are people searching for using tools e.g. Wordtracker (www.wordtracker.com)
- keywords are words that appear the most in a page
- the spider chooses the appropriate keywords for each page, then sends them back to its SE
- your web site will then be indexed based on your keywords
- can be key phrases or a single keyword
- do not use common words eg 'the' 'and' 'of': spiders ignore them
- write keyword-rich text
- balance keyword-rich and readability
- always have text in your page: at least 100 words

SEO strategies/techniques

4. Title tags

- important in optimizing rankings
- the first thing that a search engine displays on a search return
- must keywords in title to be ranked no. 1
- should have the exact *keyword* you use for the page
- every single web page must have its own title tag
- you can use up to 65 characters - example

5. Meta description tags

- displayed below the title in search results
- use dynamic, promotional language
- use keywords

Internet

SEO - what is NOT recommended

- Flash and shockwave - spiders do not pick up these files
- Image only sites - spiders do not pick up images
- Image maps - spiders cannot read image maps
Do not use them on your home page or critical pages
- Frames - only one page can be titled (titling is critical in search rankings)
 - If the spider cannot read the complete page (because of the frames), it will not be indexed properly.
 - Some spiders may not even read a frames web site
- Misspellings, JavaScript or HTML errors (validate your code)

SEO and SEM

- Search engine optimization (**SEO**)
 - no cost per click
- Search engine marketing (**SEM**)
 - cost per click

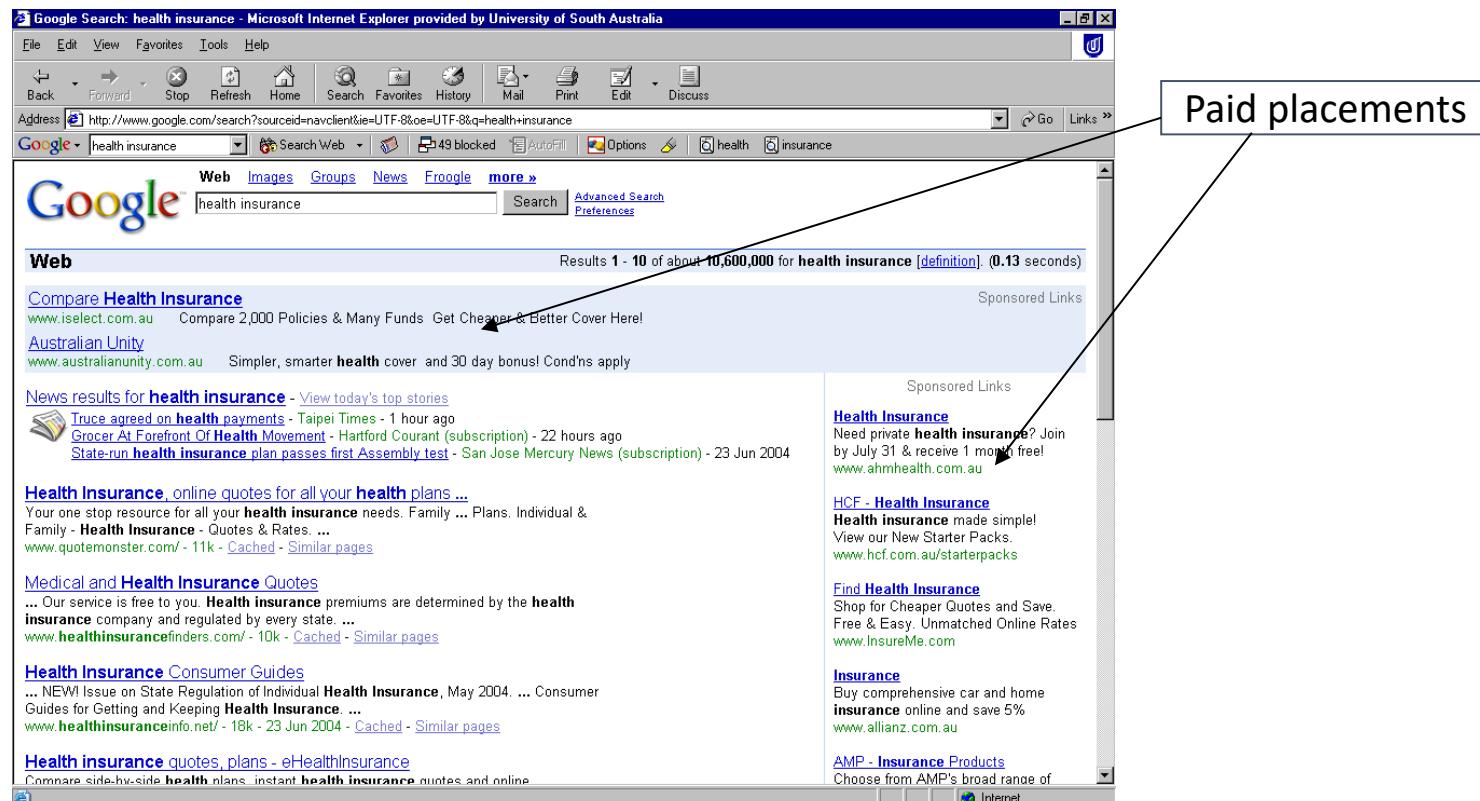

SEM

What is search engine marketing (**SEM**)?

SEM is the act of marketing a website via search engines by purchasing paid listings

What are paid listings?

These are listings that search engines sell to advertisers, usually through **paid placement** or **paid inclusion** programs. In contrast, organic listings are not sold.

SEM

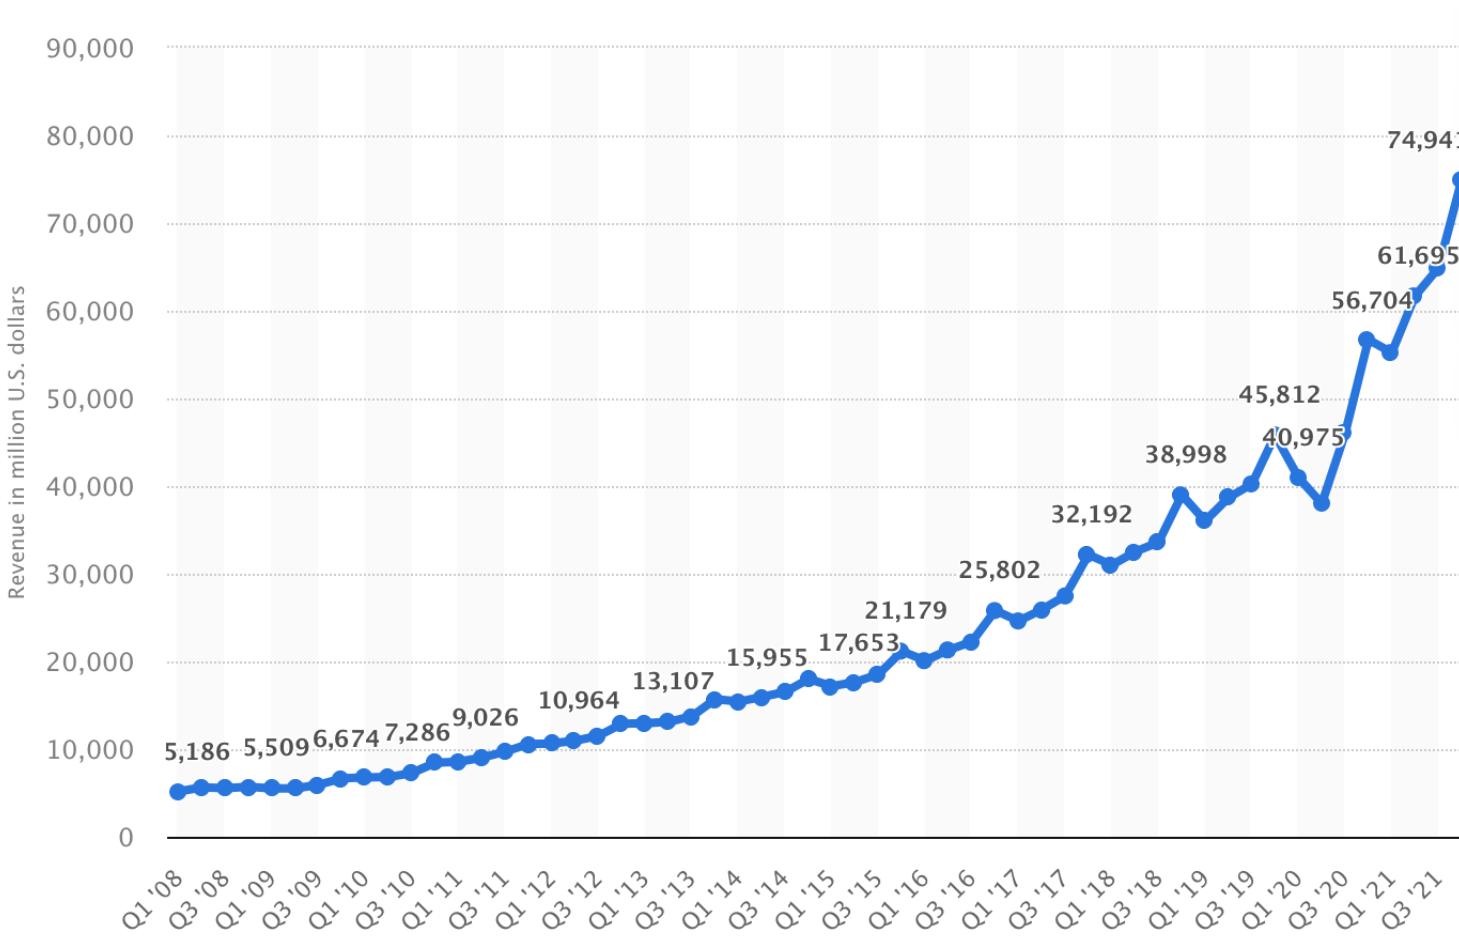

1. Paid inclusions

- Advertising programs where pages are guaranteed to be included in a search engine's index in exchange for payment
- no guaranteed ranking
- payment made on a *Cost Per Click (CPC)* basis
- Advertisers pay to be included in the directory on a CPC basis or per-url fee basis with no guarantee of specific placement

2. Paid placements

- Advertising programs where listings are guaranteed to appear in organic listings
- the higher the fee, the higher the ranking
- eg *sponsored links* and *Google's Ad words*
- can be purchased from a portal or a search network
- search networks are often set up in an auction environment where keywords and phrases are associated with a cost-per-click (CPC) fee.

Revenue for Google

Search engine for mobile apps

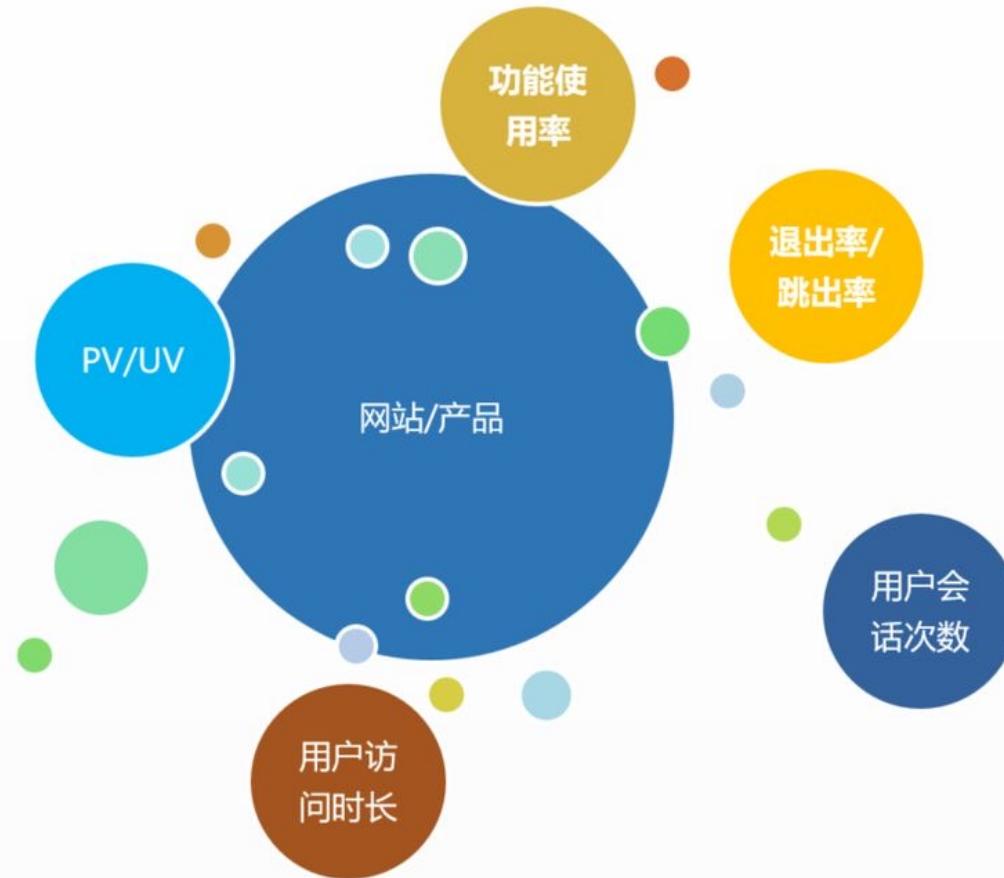

The screenshot shows a search results page for the game "王者" (King) on the "豌豆荚" (Douban Jiang) platform. The search bar contains the query "王者". Below the search bar are navigation links: 首页 (Home), 软件分类 (Software Categories), 游戏分类 (Game Categories), and 排行榜 (Ranking). The main content area shows search results for "王者荣耀" (King of Glory). The first result is "王者荣耀-手游版" (King of Glory - Mobile Game Version), which has 6180 players pre-registered and a "View Pre-registration" button. The second result is "王者荣耀" (King of Glory), which has 4224.6 million installations and a "View" button. The third result is "恋爱聊天话术库" (Love Chat Script Library), which has 2.4 million installations and a "View" button. A small watermark "清朗专项 02-08" is visible in the bottom right corner of the search results area.

Ranking, optimization and marketing (pay for ranking)

Benchmark for a web/app

|| 用户认知

Benchmark for a web/app

- For pc web
 - PV: *page view*
 - UV: *unique visitor*
- For mobile app
 - DAU: *daily active user*
 - MAU: *monthly active user*
- ROI : *return on investment*
- GMV : Gross Merchandise Value is a metric that measures your total value of sales over a certain period of time.

A golden guideline

Google does NOT follow this slogan anymore!
